

Nature as a display

Nearly all year round

Our concept, blooming field logos, enables nature to grow again.

By connecting habitats, we bring back butterflies, wild bees and threatened native species (Red List).

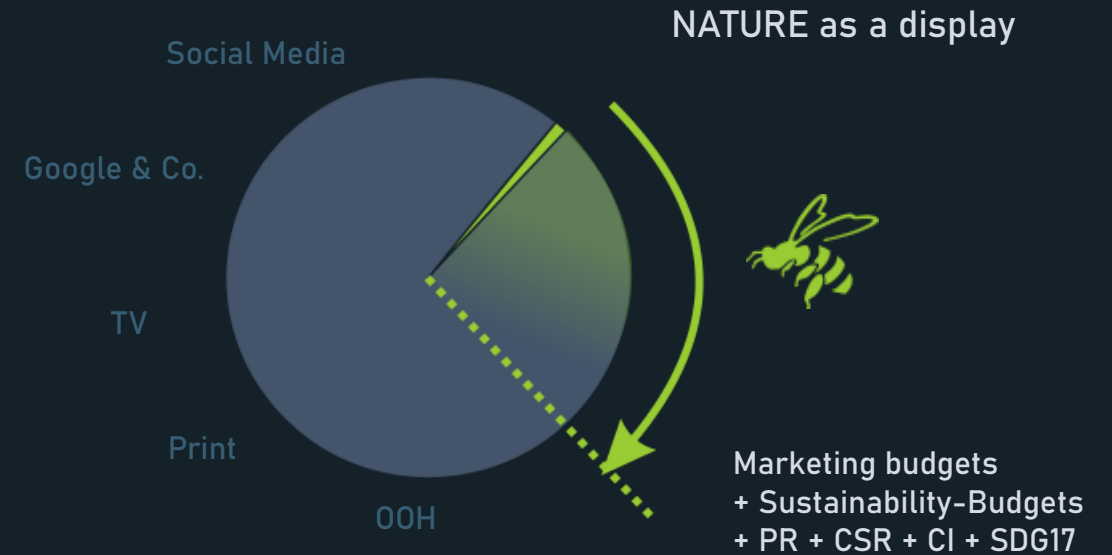

Our field advertisements bloom in all the beautiful colours of nature, nearly all year round.

Firstmover

Our specially developed methods have proven themselves to be unique and precise.

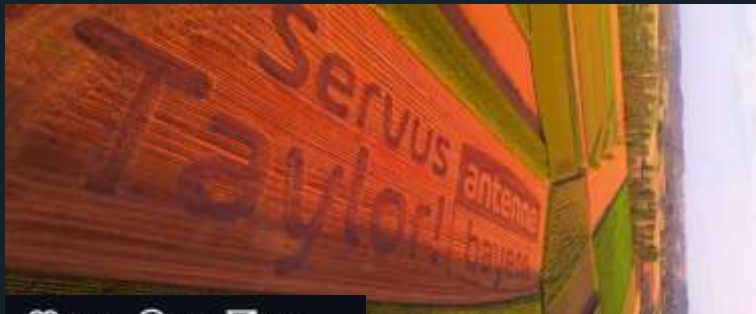

Our Vector-Seed® and MultilayerSeed processes allow never before seen accuracy.

Sustainability is our priority...
and should not cost more than other forms of advertising.

Strong references

Positive feedback and reviews show the enthusiasm of our customers. Our start-up has gained attention and reached far.

„What a viral, awesome piece that went and is going through the roof (...)! Impressive Taylor field in front of Munich Airport.“

Johannes Kreißl, Manager Marketing & Kommunikation, antenne bayern group

„Genious marketing can be this simple.“

„Extremely precise and realised to our complete satisfaction.“

„This is incredible. We are amazed!“

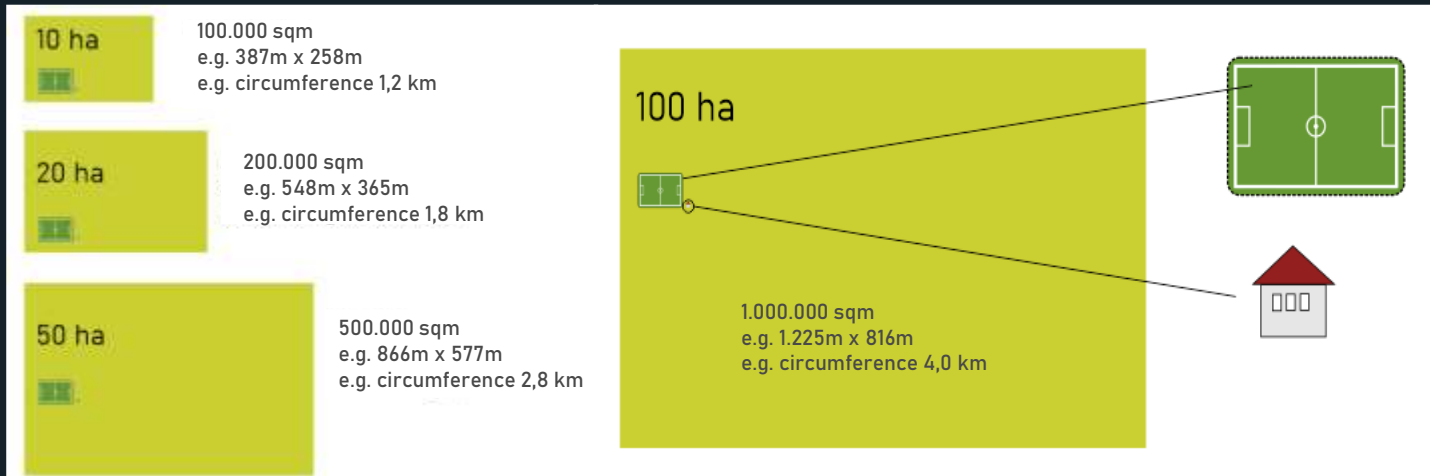

„(...) How does it work together? I think it worked really well! You are an incredibly professional partner. I noticed that from day one. In terms of the handling, the implementation, the planting, but also the creativity - the way you approached finding solutions when there were problems.(...)“

Christian Hammerschmidt, Senior Brand Manager
(DEUTSCHE TELEKOM AG)

Sustainability in XXXL

The size of the advertisement can differ – but we do not think small.

A large amount of fields from 5 to 120 hectares are waiting for your project.

A field advertisement needs time to be prepared, however the amount is variable.

Typical cultivation times:

- Late fall
- March
- July

Preparation time:

- Normally 3-6 months
- Minimum: 2-4 weeks

Simply amazing
