

Sustainable.

We sow your project.

Nature as a display

Our field pictures made of flowers

- connect habitats
- promote native biodiversity
- fulfill SDG-17 goals
- can be experienced up close
- bloom in all the colours of nature
- draw attention
- are a win-win-win for nature, farmers and advertisers
- are implemented with our precise Vector-Seed® and Wildflowers-MultilayerSeed methods

large selection of fields

Satellite image from an altitude of 780 km

Example: A nature sponsorship in XXL Telekom (German Sustainability Award)

- 21,7 million wildflowers
- in 3,2 million sugar beets
- 40 hectares (roughly 56 soccer fields)
- 70 different native species of flowers
- amongst them threatened species (Red List)
- 3,6 kilometres wildflower trail
- Bee hives, insect-monitoring

We distinguish ourselves through our precision technology, great references and the added value we bring to nature. Our logos made of flowers bring back butterflies, wild bees and native species.

Our sustainable field advertising is possible in all the beautiful colours of nature and can be experienced almost all year round.

Fields available for advertisements from 5 to 120 hectares are waiting for your project. Let's plan together.
